Allen's Seeds

TESTED, TRIED and TRUE

NOTICE

IN SENDING US YOUR ORDER be very careful about proper address so as to avoid delay in mail as well as being returned by the Postoffice authorities for proper address, and care should be used to have return name and address on all letters containing money.

METHODS OF SHIPPING. Unless specified in order we use our discretion in method of carrier for delivery, basing our judgment on classification of seeds, number of pounds in package, and manner in which order is sent, at all times with our endeavor to avoid any additional expense to our customer. We readily ship orders C. O. D. Express, C. O. D. United States Mail, or Order Notify Freight, with our Draft Attached to Bill of Lading through your bank. However, personal checks may be used or Postoffice Money Orders and Express Money Orders purchased at a smaller amount of expense than C. O. D. Charges on return of money.

OUR GUARANTEE. We use at all times the utmost degree of care in placing our contracts with growers of seeds, and only buy from those with whom we have had past satisfactory experience, or the very best of reference from our oldest growers. We cannot absolutely guarantee any stock to be of a specified strain, but we do **guarantee** that our stocks are filled from **reliable** growers who we have every reason to believe give us as good as can be grown, and are always willing to receive complaints when justly based, and will investigate thoroughly at our source of supply before purchasing for our trade again. However, "we give no warranty, express or implied, as to the strain, productiveness or condition of crop on any seeds handled by us, and if the purchaser does not accept goods on these terms, they are to be returned at once."

Parcel Post Rates on Packages by Mail

Mileage Based from Sanford

Pounds	50 Miles	150 Miles	300 Miles
1	.05	.06	.07
2	.06	.06	.08
3	.07	.07	.10
4	.08	.08	.12
5	.09	.09	.14

Note.—For computation simply remember that charges are based on five cents for first pound and 1 cent per pound for each succeeding pound in weight within one hundred and fifty miles.

Between 150 miles and 300 miles distance, add two cents (2c) to charges on same package for 150 miles, and you are correct. The above explanation is to enable customers to know just what amount to add for postage on articles not prepaid.

A Seed Business of Real Quality

The real value of a chemical is ascertained by its action under test.

The real value of a metal is found by its weight. So the real value of a **seed house** is learned by the results of the seed that is sold when the seed have been planted. Therefore **quality** of the seed sown means success by the experienced planter.

We all know what the word **quality** means to the planter.

To secure this **quality** depends also on equal amount of care by the **seed** merchant as to where the seed are raised, and by whom grown.

The seed growing sections from which all seed merchants' stock comes from are distributed over the entire United States, Canada, South America, Europe, Asia and the islands of the seas. Therefore, it is very important of the seed merchant to have accurate knowledge of where the various seed stocks can and must be grown to give the best results.

We have been in the seed business for fifteen years and consequently we are acquainted with the above facts, which we feel sure the quality of our seed will bear out.

A great many people have the belief that the Florida farmers must purchase their seed from Northern or Western Seed Houses. This is erroneous, as any firm who applies the proper effort can certainly better know what is necessary, essential and profitable to his or their own State, when some member of that firm is continually in personal touch with their customers.

We do not believe that another firm exists which can better serve you both to your profit, as well as ours, than **we**, because we are of Florida ourselves and for the past fifteen years have been in direct touch with agricultural conditions as they exist here and are now extending our efforts.

We believe therefore, we are in better position to give you seed more properly suited to Florida planting than houses further North, or even out of this State, because we have but one condition to meet, and that is Florida .

Our location again speaks for our efficiency. We are daily serving growers who are the largest planters of garden produce in the State. These planters are naturally and by necessity **careful**. But we have demonstrated to them that we have the **goods**, and in return are getting their business. **Sanford** is known over the entire United States for its **quality** of **celery** and **lettuce**, to say nothing

of the other products in the vegetable family that leave here in car lots, making this city the **first** shipping center of Florida, and just as Sanford is known for her Quality of product, we are known in **Sanford** and other sections of Florida for our **quality seed**.

We will gladly furnish on request the names of growers furnishing us with any particular seed or seeds and would be glad to refer you to planters in any section of Florida as to their satisfaction with us, therefore, we ask that you place a portion of your next order that has been going out-of-State, and consider the comparison under same conditions of products from our **seed** and our competitors.

We therefore, in conclusion, furnish the following pages of this Catalogue for your kind consideration and wish you the most prosperous year in the history of your farming for the coming seasons, offering our services and suggestions when desired, while we beg to remain,
Yours for better seed,

Chickens

Having made arrangements with one of the largest poultry raisers in the country we are now prepared to furnish our trade with the following strains, with either eggs or young chicks, at the following low prices:

White Leghorn, headed by Tome Bear Improved Cockerels. The very best strain:

15 Eggs -----	\$1.25
Young chicks at -----	.25

Rhode Island Reds, True Strain:

15 Eggs -----	1.50
Young Chicks at -----	.25

We guarantee safe delivery on all chicks and can ship any time from February 1st to June 1st. When ordering chicks add 50c for our Little Chix Buttermilk Starter, and see results.
